

- Stud for accelerometer mounting
- Stainless steel 303S31
- -70°C to +200°C range
- 10/32UNF to M6x1.0 thread
- Non-isolated

The KMS-10M6 is a stud for the direct screw mounting of an accelerometer.

The threads are 10/32UNF and M6 x 1.0pitch. The stud can be used in either direction depending on the thread requirements of the mount and accelerometer.

The KMS-10M6 can also be used in conjunction with the following mounts as adaptor studs:

KMMAG-21
KMISO-ADH

Recommended mounting torque 1.2Nm
